

# Solid State High Power Amplifier

**2229**
**2900 – 3500 MHz / 2.5 kW<sub>PK</sub> Pulsed**

The 2229 is a single drawer unit equipped with harmonic suppression filter produces a minimum output power of 2.5 kW peak pulse or 500W CW in the S-band frequency. The amplifier features multiple high power GaN on SiC devices that provide wide frequency response, high gain, high peak power capability, and low distortions. Exceptional performance, long-term reliability and high efficiency are achieved by employing advanced broadband RF matching networks and combining techniques, EMI/RFI filters, and all qualified components. The amplifier includes integral forced air-cooling fans. Available operating voltage configurations are single-phase, three- phase AC up to 400 hertz and 28 volts DC

The amplifier includes a built-in control and monitoring system, with protection functions which preserve maximum output capability and reliability. Remote management and diagnostics are via an embedded web server allowing network managed site status and control simply by connecting the unit's Ethernet port to a LAN. Using a web browser and the unit's IP address (IPV4) allows ease of access with the benefit of multilevel security. The control system core supports hardware encryption, runs an embedded OS (Linux), has a built-in non-volatile memory for event recording, and factory setup recovery features. The extended memory option allows storage of control parameters and event logs.

We are delivering more than just RF power, the next generation family of systems provide dynamic adjustments linked to the processing power and digital controls, which focus on maximizing system availability time as well as power output under ALL conditions.

Empower RF's ISO9001:2015 Quality Assurance Program assures consistent performance and the highest reliability.

- Solid-state class AB compact modular design
- Suitable for instantaneous pulse operation over the operating band.
- Embedded directional coupler – Eliminates the need for external component.
- 50 ohm input/output impedance
- Built-in Control, Monitoring and Protection functions
- High reliability and ruggedness

## ELECTRICAL SPECIFICATIONS over temperature conditions (0 to +50°C)

| Parameter   | Symbol                               | Min             | Typical | Max     | Unit    |
|---|--------------------------------------|-----------------|---------|---------|---------|
| Operating Frequency   | BW                                   | 2900            |         | 3500    | MHz     |
| Power Output – Peak Pulse <i>Note 2</i>   | P <sub>SAT_PK</sub>                  | 2500            |         |         | Watt    |

| Operating Voltage   | 3-phase (Line-to-Line)               | V <sub>AC</sub> | 180     | 208     | Volt    |
|   | 1-Phase                              |                 | 100     | 260     |         |
| Power Consumption @ 20% <sub>DC</sub> , P <sub>OUT_PULSE</sub> = 2.5W <sub>PK</sub> | P <sub>D</sub>                       |                 | 1350    | 1750    | VA      |

Notes: 1. Call factory for application >20% duty cycle.  
 2. The front RF connectors option output power is less by up to 1.50 dB due to added insertion loss of the RF cable routed to the front panel.

## PROTECTIONS

| Parameter             | Specification   |
|-----------------------|---|
| Input Overdrive       | ≥10 dBm – Shutdown  |
| Load VSWR Protection  | The unit disables the RF when reverse power exceeds the safe level @ all load phase & amplitude |
| Thermal Shutdown      | Baseplate ≥90 °C  |
| Default Data Recovery | Factory Default Calibration Recovery  |

|--|------------------|-----|-----|--------|------|
| Operating Ambient Temperature <i>NOTE **</i>                                     | T <sub>C</sub>   | -10 |     | +50    | °C   |
| Non-operating Temperature  | T <sub>STG</sub> | -35 |     | +75    | °C   |
| Relative humidity (non-condensing)   | RH               |     |     | 95     | %    |
| Altitude (MIL-STD-810F)  | ALT              |     |     | 10,000 | Feet |
| Shock / Vibration (MIL-STD-810F,<br>Shock Method 516.5 , Vibration Method 514.5) | SH / VI          |     |     |        | -    |

Note: \*\*Call factory for extended operating temperature range.

## COMMUNICATION INTERFACES:

| Function                                     | Utility                                      | Connector |
|--|--|-----------|
| Ethernet                                     | Network management of device / web interface | RJ45      |
| RS232, default (RS422, factory configurable) |  |           |

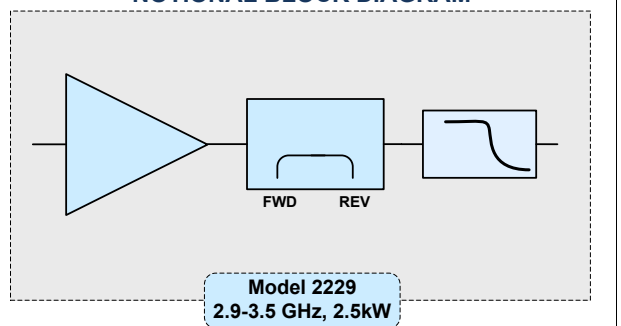

## SYSTEM I/O CONNECTOR – 14-Position

| Pin # | Description                | Specification   |
|-------|----------------------------|---|
| 1     | FWD Test Point             | Forward detected power (analog voltage: 0-5 Volt)                               |
| 2     | REV Test Point             | Reverse detected power (analog voltage: 0-5 Volt)                               |
| 3     | Summary Fault              | Summary Fault: Active TTL Logic Low ( $\leq 0.7V$ )<br>(Internally Pulled-High) |
| 4     | Reserved                   | No Connection   |
| 5     | Shutdown                   | Amplifier Disable: TTL Logic Low ( $\leq 0.7V$ )<br>(Internally Pulled-High)    |
| 6     | Aux P/S Test Point         | +12.0V <sub>DC</sub> $\pm 2.0V$ (resettable 0.5amp fuse)                        |
| 7     | Main P/S Test Point        | +44.0V <sub>DC</sub> $\pm 4.8V$ (resettable 0.5amp fuse)                        |
| 8     | GND                        | Ground  |
| 9-11  | Open drain control         | Site management utility (reserved)  |
| 12&13 | Digital I/O (configurable) | Site management utility (reserved)  |
| 14    | GND                        | Ground  |

## Available Options

|  |
|--|
| <b>2229-00X</b>  |
| <b>-001</b> 180-260 VAC, 3-phase-Delta, 47-63 Hz, Rear RF Connectors |
| <b>-002</b> TBD  |
|  |
| Contact us for other available options                               |
| <b>Standard Feature:</b>   |
| -LCD Control, Ethernet & Serial Comm                                 |
| - SMA-F Sample Ports: Forward & Reverse                              |
| -Blanking/Gating Port: BNC-F   |
| -Rack Slides, Handles and Rackmount Brackets                         |
